

FEBRUARY 20, 2009 -- "AND THEN THERE WAS LIGHT"

Welcome beloved daughter. We heard your call. Please state your request again.

“Can you comment on the teachings of a Master Guide Kirael and the “Three Days of Darkness” called in as part of the Great Shift?”

Ah, yes.... We smile upon thee as this period of adjustment as being given a space/time component of what is measured as 3 days of linear time. Master Kirael has used this analogy to represent a period of metamorphosis – when the “time” of transition is to come when the body of the physical shall be changed into the form of a crystalline BE-ing of light.

Remember what we said about the darkest and coldest hour being that before sunrise – the entrance into the photon belt is a great event when the energies and frequencies of light are such that they illuminate every cell of every molecule of life. The photon is the basic and first expression of manifested form of the One Infinite Creator. Thus, during the time of the “three days”, a new form is birthed. If you recall the Bible and its story of Genesis –about the world being created in 7 days, these days were not 24 hour measurements as you know them. Thusly, the 3 days of Kirael time are not the same as 24 hours.

The time of going into the photon belt is at hand. Your great Logos – Son/Sun has made its journey into the photon band and is fully immersed in its outer edge. This is creating a change in how the Sun radiates light and heat and frequency to Earth. What is not mentioned by the Master is when and how this affects the Sun which is part of your solar system and also, the other planets of your system since they will also move into this band.

This will cause all bodies of planetary space/time to transition into the 5th Light as well. This is an Ascension frequency. What occurs at this point is how the inhabitants of each planet transition with the influx of energy. Photon energy is creative and it is used by thought. That is why one must be focused on the Divine within at all times, for there is no direct measurement of when the Earth shall enter fully into this band.

It is Divinely decreed that the Earth and her inhabitants will move into the higher vibration and frequencies at that time. The carbon-based body of a human, will not withstand these frequencies. Rather, the crystal-based body/light body will be able to absorb the light and frequencies with greater ease and will use the light to create a “Heaven on Earth.”

This is the plan of the One Infinite Creator—to move its children/creation to the next level of evolution or as you would say, a next stage of being in action – re-action where joy, peace, harmony and compassionate wisdom are the prevailing thought form creations.

This is the premise of the Great Shift and how the 3 days of darkness will manifest this result. Do not go into fear about the space/time that it takes to complete this process as you have already been in the 3 days, over many incarnations. This is nothing new to you personally.

All is in Divine order. You are here at this time to assist those who sleep in the photon light, whose bodies are weak and frail and whose minds are trapped in the illusion of fear, doubt, sorrow and suffering by their own hands. As a conscious creator, you are responsible for your own choices and actions. You can only guide and assist others by your modeling of the path to the higher light in action and in word.

Choose your words carefully as there are those of other races of galactic origin who do not want to see this grand awakening and would prefer to keep mankind in unconscious slumber. Be diligent in all you say and do from this hour forward as there will be a great increase in the photon light the months of April and May when the Earth will move mountains for those who wish to ascend into the light of love, truth, trust and joy.

We are complete with this answer, with our love and trust in the One Infinite Creator. We are The Messengers of the 5th Light. -- 6:20 AM
